Education

- **Bachelor of Technology (B.Tech)**
  TECA-JNTUK, 2012

- **Intermediate**
  Sri Prakash Junior College, 2008

- **SSC**
  Viveka Vardhani Public School, 2006

Technical Skills

- **Automation Tools:** Selenium, Playwright, Appium, Cucumber (BDD), TestNG
- **Programming Languages:** Java, Python, TypeScript
- **API Testing:** Rest Assured, Python Requests
- **Test Management:** Jira, qTest, Azure DevOps, Mantis, VersionOne
- **CI/CD:** Azure DevOps Pipelines, GitHub
- **Other Tools:** IntelliJ, Visual Studio, PyCharm, MS Office

PROFILE INFO

Senior Software Development Engineer in Test (SDET) with 10+ years of experience in automation testing across web, mobile, and API platforms. Expertise in designing scalable test frameworks using Selenium, Playwright, Appium, and Rest Assured. Skilled in Java, Python, and TypeScript with strong knowledge of CI/CD pipelines, defect management, and agile methodologies. Proven track record in e-commerce, logistics, and enterprise applications, driving quality through automation, AI-driven testing, and shift-left practices.

PROFESSIONAL SUMMARY

- **Over 10 years of proven expertise in Software Testing and Automation,** delivering high-quality solutions across diverse domains.
- **Designed and executed Web and Mobile Automation frameworks** using Selenium, Playwright, and Appium to accelerate release cycles.
- **Strong programming proficiency in Java and Python**, with hands-on experience in building scalable test frameworks using TestNG.
- **Comprehensive testing expertise across Smoke, Regression, System, and Localization testing,** ensuring end-to-end product validation.
- **Developed and maintained API automation suites** using Rest Assured and Python Requests**,** improving coverage and reducing manual effort.
- **Skilled in defect tracking and test management tools** including qTest, JIRA, Azure DevOps (ADO), Mantis, and VersionOne, ensuring streamlined collaboration and reporting.
- **Extensive experience testing complex e-commerce and logistics applications**, focusing on performance, scalability, and reliability.
- **Pioneered AI-driven testing initiatives** for defect prediction, intelligent test case and test script generations, and optimized regression suites.
- **Implemented AI-based test prioritization strategies** to optimize execution time while maximizing coverage.
- **Leveraged GitHub Copilot** to accelerate test script development, enhance code quality, and reduce repetitive manual tasks.
- **Adopted Shift Left testing practices,** integrating early test design and automation into the SDLC to detect defects sooner and reduce overall cost of quality.
- **Collaborative team player with strong communication and problem-solving skills**, fostering cross-functional alignment.
- **Quick learner, adaptable, and committed to continuous improvement**, consistently driving innovation in testing methodologies.

WORK EXPERIENCE

Sr. SDET
Unify Technologies Pvt Ltd (Client: Conga) | Feb 2023 – Present

Project Name	:	Propose & Quote and EUF
Client	:	Conga-The Revenue Company
Platform	:	Java, Selenium, Playwright, Rest Assured.

- Automated **85% of regression test cases** using Selenium and Playwright, reducing manual effort by **40 hours per sprint**.
- Conducted PR reviews and merged automation scripts, improving code quality and reducing defects by **25%**.
- Performed defect analysis, retesting, and closure to maintain release stability.
- Supported sprint releases and post-deployment validation, ensuring 99% defect-free delivery.
- Implemented compatibility testing across multiple platforms and devices.

Test Specialist
Birlasoft Ltd (Client: S&P Global) | July 2020 – Oct 2022

Project Name	:	Subscription Approval-RAP Admin
Client	:	S&P Global-Crisil
Platform	:	Java, Python, Selenium, Rest Assured

- Automated web applications with Selenium and Python, increasing automation coverage from **60% to 90%**.
- Managed test solutions and stakeholder feedback using Azure DevOps.
- Performed functional, regression, UAT, and smoke testing across multiple back-end systems.
- Enhanced frameworks through R&D activities, improving automation efficiency.

QA Engineer
Nisum Consulting Pvt Ltd | Nov 2017 – June 2020

Project Names	:	Controlling Credit finance Plan
		Star Rewards
		Mobile CX enhancements & B-money
		Non-Transactional Offers
		My Wallet
Client	:	Macys and Bloomingdales

Platform : Java, Python, Selenium, Appium, Cucumber BDD & Rest Assured

- Automated functional tests using Selenium WebDriver and Cucumber BDD.
- Authored feature files and implemented scripts in Java.
- Conducted regression testing for new features and updates.
- Customized Jira for scheduling, tracking, and reporting test activities.

Test Engineer
Falconnect Technologies Pvt Ltd | Nov 2016 – Nov 2017

Project Name : Dealer plus Application (Mobile & Web)

Client : Chola Mandalam (Chennai)

Platform : Java, Selenium, Appium

- Automated mobile and web applications using Selenium and Appium.
- Executed test cases across multiple browsers and platforms.
- Reported defects using Mantis and generated test summary reports for management.
- Performed functional, regression, GUI, and user acceptance testing.
